## **Objective**

A highly motivated and results-driven software engineer with a strong foundation in backend development, particularly in Python. Seeking a challenging role in a dynamic organization where I can leverage my skills and experience to contribute to innovative projects and continuous improvement.

## **Education**

Refactory Academy

Certificate Of Software Engineering with python

Graduated: June 28, 2024

## **Technical Skills**

**Programming Languages:** Python, JavaScript

**Frameworks & Libraries:** Django, Flask, React.js

**Databases:** PostgreSQL, MySQL, MongoDB, db.sqlite3

**Tools & Platforms:** Docker, Git, Jenkins

**Others:** CI/CD, TDD, BDD

## **Professional Experience**

UG Dev Summit Attendee

July 2024

Participated in a two-day summit focused on the latest trends and technologies in software development.

Engaged with industry experts, attended workshops, and networked with professionals to broaden my knowledge and skills.

## **Projects**

### **A Data management System**

Developed a scalable backend system for a data management system for a daycare using Django and DB.sqlite.

Implemented features like user authentication, product management, and staff registration . It helps the daycare centralize, organize, and optimize their data.

### **A web Movie streamlining application**

A web application that helps users discover, organize, and watch movies in a streamlined way. It aggregates movie information from various sources, allows users to create personalized watchlists, and provides recommendations based on their viewing history and preferences.

### **Professional Development**

Attended UG Dev Summit, gaining insights into the latest industry trends and best practices.
